● Worked on REST API calls for receiving and sending information to the client side ● Handled all the API calls

APRIL 2020 - JUNE 2020
Reflect Technologies, Chennai - *Frontend Developer Intern (2 months)*
● Made a website from scratch for handling all the views to the products ● Worked on different platforms like Wordpress for a different site.

Projects
Wozzby (04/2020 – Present)
   ● An app as well a web application using Python, JavaScript, HTML ● The team of 5 founders designed this as a platform to host all your events, from mail services to virtual hackathon implementation.
Handwritten Text Recognition
   ● It reads the uploaded image, using image processing and converts it into normal text● Also implemented the library Spacy of NLTK to use this text and match it with a given text to get match percentage,(this part helps the faculty to pace up with long answers).
Smile Again
   ● A Web Application in JavaScript and HTML providing services to the elderly, by adding a question and answering platform and integrating with ML models.

Community Work
Google Developer Student Clubs, VIT Vellore (12/2018 – Present), *Manager*
CodeChef-VIT (12/2018 –09/2019), *Core Committee Member*
Organized the following events:
   ● DevJams Hackathon 2019 - 1000+ participants
   ● WomenTechies 2019, women-centric hackathon - 400+ participants
Code Asylum(06/2020 – Present), Campus Ambassador
